Annual Proportional Giving

Proportional giving means giving a percentage of your annual income. Look at your overall income and then calculate how much you give to charity. We suggest starting at two or three percent and then gradually increasing each year. Scripture encourages giving a tithe or ten percent. The best way to achieve this goal is to slowly and deliberately increase your giving each year. You may just find that the more you give the less you will worry about money. We know this sounds paradoxical but if you ask anyone who has achieved the tithe they will agree.

Annual Income	2%	4%	6%	8%	10%	12%
\$30,000	\$600	\$1,200	\$1,800	\$2,400	\$3,000	\$3,600
